

Mercury-Free R20P D-Size Battery

This mercury-free R20P battery delivers high power for demanding devices. It is designed for optimal efficiency, extended shelf life, and reliable energy delivery.

Product Overview

High Power D-Size Energy Solution

These mercury-free high power batteries are engineered using highly refined chemical raw materials to provide superior, consistent power. Designed with environmental safety in mind, they offer an excellent balance of heavy-duty energy, reliability, and endurance. They are suitable for a wide range of demanding general-purpose electronic applications.
