

Mesh Bed Utility Cart with Pneumatic Tires

This mesh bed utility cart is designed for various tasks, featuring a durable metal frame and a mesh bed for secure transport of items. It is equipped with four pneumatic tires for smooth movement over different terrains.

Overview

Versatile Utility Transport

This lightweight mesh utility cart is engineered for efficient material handling in nursery, garden, and warehouse environments. Featuring a durable mesh deck and robust pneumatic tires, it ensures stable transport of goods over uneven terrain. With a 300lb load capacity, it combines ease of maneuverability with reliable performance for both residential and light commercial applications.
