Product Overview

Specialized Borehole Clearing Tool

The Mesh Pebble Fishing Bit is a specialized tool engineered for retrieving lost objects and clearing obstructions from boreholes. Featuring a durable mesh structure, it is designed to efficiently capture and retrieve debris such as pebbles, gravel, and loose materials. This robust design incorporates strategically placed cutting elements to ensure effective penetration and removal of compacted obstructions, making it an essential component for geotechnical and construction drilling operations.

Technical Specifications

Cutting Tool Type	Pick
Applicable Formations	Hard rock, Rebar Concrete
Customization	Yes
Customization Details	Technical parameters can be customized according to specific customer needs.
