

Metal and Plastic Hacksaw with Adjustable Tension

This hacksaw is a fine-toothed saw used for cutting materials like metal or plastic. The blade tension can be adjusted to improve cutting performance.

Product Overview

Professional Grade Hacksaw

This durable hacksaw features a robust C-shaped frame designed for precision cutting of both metal and plastic materials. Equipped with an adjustable tension mechanism, it allows users to optimize blade tightness for improved cutting performance and control. Ideal for plumbing, construction, and metalworking applications, this tool is built for reliability and versatility.

Technical Specifications

Blade Technology

Bi-Metal • High Speed Steel

Key Design Features

- Adjustable blade tensioning system
- C-shaped frame design
- Ergonomic handle grip
- Replaceable blade system

Compatible Materials

Metal, Plastic

Applications

Primary Industries

- Plumbing
- Construction
- Metalworking
