

## Metal Ball Valve with Butterfly Handle

This ball valve is designed for general machinery applications. The valve has a threaded inlet for secure connection to a water supply or other fluid system, and the outlet is a barbed fitting, designed for connecting to a hose or flexible tubing.

### Product Overview

#### Industrial Ball Valve

This metal ball valve is engineered for reliable flow control in both industrial and domestic fluid systems. Featuring a durable metal body and a high-visibility butterfly handle, it allows for quick and easy on/off operation. The combination of a threaded inlet and a barbed outlet makes it a versatile solution for secure connections to water supplies or flexible tubing.

### Technical Specifications

Handle Style	Butterfly Handle
Inlet Connection	Threaded
Outlet Connection	Barbed Fitting
Body Material	Metal, Brass/Stainless Steel

### Applications

#### Suitable Applications

- General Machinery
- Industrial Fluid Systems
- Domestic Water Supply
- Hose and Tubing Connections
