

Metal Bond Diamond Squaring Wheel

This is a high-precision metal bond diamond squaring wheel. It features robust construction for extended lifespan and consistent performance.

Overview

Precision Diamond Squaring Solution

The Metal Bond Diamond Squaring Wheel is an essential tool for achieving precise edge uprightness on large-format ceramic and porcelain tiles. Engineered for durability and consistent performance, these wheels ensure high-quality edge finishing without chipping or breaking. Designed to meet rigorous industrial standards, they offer a reliable solution for both glazed floor tiles and rough squaring processes.

Technical Specifications

Key Performance Advantages

- High sharpness for efficient material removal
- Extended working lifetime
- Low operating noise levels
- Superior edge uprightness
- Minimal chipping and breakage

Bond Type

Metal Bond

Suitable Materials

Glazed Floor Tiles, Polished Porcelain Tiles, Large Format Ceramic Tiles

Certifications

Quality & Management Certifications

ISO 9001 • ISO 14001 • OHSAS 18001 • CNAS Certified

Product Classification

Wheel Classification Options

Classification Basis	Types
Grinding/Cutting Mode	Peripheral Wheel, Disk Wheel
Bond Material	Metal Bond, Resin Bond
