

Metal Bond Diamond Squaring Wheel

This metal bond diamond squaring wheel features good sharpness and a long working life. It is designed for accurate and efficient squaring operations on a variety of hard and abrasive materials.

Overview

High-Precision Squaring Performance

This metal bond diamond squaring wheel is engineered for accurate and efficient squaring operations on hard and abrasive materials. Featuring a robust metal matrix embedded with high-quality diamond abrasive particles, it delivers superior cutting performance and extended tool life. The segmented rim design is specifically crafted to facilitate efficient swarf removal and cooling, minimizing heat buildup during intensive industrial use.

Technical Specifications

Bond Type	Metal Bond
Abrasive Material	Diamond
Rim Design	Segmented

Applications

Suitable Materials	Stone, Ceramics, Hard Materials, Abrasive Materials
