

Metal Bonded Diamond Grinding Plate

This metal bonded diamond grinding plate is designed for removing coatings and imperfections from concrete and masonry surfaces. It is suitable for grinding, polishing, refinishing, and leveling applications.

Product Overview

Professional Diamond Grinding Plate

This metal bonded diamond grinding plate is engineered for high-performance concrete and masonry surface preparation. Designed for aggressive material removal, it excels at erasing imperfections, leveling uneven joints, and removing hard coatings or epoxies. The plate features large segments with a high concentration of extra coarse diamonds to ensure efficient stock removal and long-lasting durability in demanding floor grinding applications.

Technical Specifications

Primary Applications

- Concrete floor grinding
- Masonry surface preparation
- Removing hard epoxies and coatings
- Erasing concrete imperfections
- Leveling uneven spots or joints
- Surface polishing and refinishing

Grit Size	25/30 (Extra Coarse)
-----------	----------------------

Usage Compatibility	Dry Use, Wet Use
