

Metal Brush Set for Cleaning and Deburring

This set contains two metal brushes designed for cleaning and deburring. The brushes feature durable metal housings and fine metal bristles.

Product Overview

Precision Cleaning and Deburring

This two-piece metal brush set is engineered for high-precision cleaning and deburring applications. Featuring durable, industrial-grade construction, the set includes a specialized brush head with fine metal bristles for effective surface finishing. It is designed to withstand rigorous use in demanding environments such as automotive maintenance, precision machining, and electronics assembly.

Technical Specifications

Primary Applications

- Cleaning
- Deburring
- Surface Finishing

Industry Suitability

Automotive • Machining • Electronics

Set Composition

2 pieces

Finish

Metallic, Machined
