

Metal Button Forming and Striking Machine Set

This machine set produces metal buttons and attaches them to fabric. It is capable of feeding material, creating designs, packing buttons and welding metalcraft flower designs.

Overview

Professional Metal Button Forming & Striking Solution

This comprehensive machine set includes specialized equipment for both button production and striking applications. The forming unit is designed for efficient material feeding and design creation in a single operation, while the hydraulic striking unit provides reliable finishing for metalcraft ornamental work. This combination offers a convenient and robust solution for high-quality metalworking and button assembly.

JG-ZK Producing-Button Machine

Capacity Metrics

200 mm
Working Travel

130 mm
Closing Height

Working Pressure	200 KN
Working Speed	120 r/min
Motor Specifications	380V 50Hz 3HP 4P

JG-DK Striking-Button Machine

Equipment Type

Hydraulic • Semi-automatic

Striking Button Sizes

- 32
- 20
- 10

Physical Specifications

Metric	Value
External Size (LxWxH)	1000x805x750 mm
Net Weight	300 kg
Total Weight	370 kg
Oil Tank Course	80 mm

Motor Performance	2.2KW 220/380V 50/60HZ 3PH
