

Metal Cage Trolley with Swivel Casters

This metal cage trolley is designed for transporting goods and materials. It features a sturdy base with four swivel casters and hinged doors with a latch mechanism.

Product Overview

Industrial-Grade Material Handling

This robust metal cage trolley is engineered for efficient material transport in industrial and commercial environments. Featuring a high-strength steel frame, it ensures maximum stability and durability during heavy-duty operations. The integrated four-caster system provides exceptional maneuverability, while the secure hinged-door design allows for convenient access and safe containment of goods.
