Product Overview

Professional Lifting Solution

These heavy-duty metal can lifting pliers are engineered for the safe and efficient transport of cylindrical containers in industrial environments. Featuring a robust high-strength steel construction with a high-visibility red finish, the tool ensures both durability and corrosion resistance. The integrated automatic locking device and chain suspension system provide stable, reliable operation for demanding lifting tasks.

Performance Specifications

Load Capacity

0.5 T

Max Load

Chain Grade

80 stage chain

Certifications

Compliance and Standards

CE, GS, TÜV Rheinland

Design Features

Core Features

- Automatic locking device
- Horizontal lifting capability
- Corrosion-resistant red finish
- High-strength steel construction
- Compact and lightweight design
