

Metal Casing Flashlight

This flashlight features a durable, ribbed metal casing for enhanced grip and robustness. Its reflector-focused lens provides optimal light projection, and a multi-position switch allows for varying light intensities.

Overview

Durable Metal Casing Flashlight Series

This series of classic metal jacket flashlights is engineered for robustness and reliability in demanding environments. Featuring a ribbed metal casing for an enhanced grip, these flashlights are built to withstand daily use or emergency situations. Each unit is equipped with a high-performance reflector-focused lens designed to deliver optimal light projection and a multi-position switch for versatile intensity control.
