

Metal Casting and Forging Machine with Manual Lever

This heavy-duty machine is designed for metal casting and forging processes. It features a hand-operated lever mechanism and a sturdy support structure for stability.

Product Overview

Precision Metal Forming Solution

This heavy-duty metal forming machine is engineered for reliable casting and forging operations. Featuring a robust red-painted steel construction, it offers the durability required for industrial metal processing. The integrated hand-operated lever mechanism provides precise control over force application, ensuring consistent results for various metal workpieces.

Technical Construction

Material and Finish	Red-painted steel
Operation Type	Manual lever mechanism
Stability Features	Support structure, Tightening knob, Secure positioning

Applications

Primary Applications

- Metal casting
- Metal forging
- Workpiece shaping
- Metal processing
