

Metal Casting Griddle Plate

This rectangular cast metal griddle plate features dual handles. It is suitable for cooking or metal forming applications, with a flat, smooth surface and raised edges.

Product Overview

Professional Grade Metal Casting Griddle Plate

This rectangular cast metal griddle plate is engineered for high-performance applications, including both industrial metal forming and heavy-duty cooking. Constructed from durable cast metal, it ensures superior heat distribution and long-lasting structural integrity. The flat, smooth surface is complemented by raised edges designed to effectively contain materials during use.

Technical Specifications

Material	Cast Metal
Shape	Rectangular
Key Features	Dual Handles, Raised Edges, Even Heat Distribution, Smooth Surface

Applications

Primary Applications

- Metal forming applications
- Machine tools
- Metal forming machines
- Industrial cooking
