

Metal-Clad Withdrawable Switchgear Cabinet

This metal-clad withdrawable switchgear cabinet is designed for electrical power distribution and protection. The switchgear features compartments for circuit breakers, busbars, and control equipment, enhancing safety and reliability.

Overview

KYN28A-12 Switchgear Overview

The KYN28A-12 armored removable AC metal-enclosed switchgear is a robust solution for power distribution and circuit management. Designed for 50Hz three-phase AC power systems, it provides essential control, protection, and monitoring capabilities. Its modular architecture ensures safety and reliability in power plants, substations, and diverse industrial facilities.

Technical Specifications

System Frequency	50 Hz
Rated Voltage	12 kV
System Compatibility	Three-phase AC, Metal-enclosed, Withdrawable

Key Features

Core Functions

- Electric energy reception
- Electric energy distribution
- Circuit control
- Circuit protection
- Circuit monitoring
