

Metal Coil Slitting Machine

This slitting machine efficiently cuts metal and steel coils into precise, narrower widths. It incorporates an uncoiler, slitting unit with adjustable blades, and a recoiler for continuous operation.

Overview

Professional Coil Slitting Solution

This high-performance slitting line is engineered for the precise cutting of metal coils into narrower, manageable widths. Designed for efficiency and stability, the system integrates a complete setup including an uncoiler, feeding guide, and advanced tension control. It is an ideal solution for metal processing industries seeking a robust, cost-effective way to manage varying material thicknesses with consistent speed and precision.

Technical Specifications

Performance Highlights

3 mm

Max Material Thickness

40 m/min

Max Line Speed

48 KW

Total Power

Coil Capacity

Parameter	Value
Min Material Thickness	0.2 mm
Max Material Thickness	3.0 mm
Inner Diameter	450-510 mm
Outer Diameter	1500 mm

Included Equipment

- Uncoiler
- Feeding guide
- Slitting machine
- Cantilevering separating system
- Tension control board
- Console
- Electrical equipment

Blade Material

40Cr
