

Metal Component for Connectors, Stands, and Bases

Precision-engineered metal components are suitable for COB connectors, speaker stands, and monitor bases. These components are manufactured using advanced metal forming techniques, ensuring high accuracy and durability.

Product Overview

Precision Metal Components

These precision-engineered metal components are designed for versatile applications, serving as essential parts for COB connectors, speaker stands, and monitor bases. Manufactured using advanced metal forming techniques, they ensure high accuracy and long-term durability for demanding electronic and hardware assemblies. The components are suitable for a wide range of industries including audio equipment manufacturing and computer hardware production.

Manufacturing Capabilities

Key Production Equipment

16 sets

16T-60T Punching Press

16 sets

45T Multi-station Punch Press

3 sets

160T Precision Press

8 sets

15T-80T High-speed Press

24 sets

5T-200T Punching Press

Stamping & Forming Processes

Deep Drawing, Extruding, Piercing, Coining, Reverse Burring, Blanking, Forming, Embossing

Applications

Typical Applications

- COB Connectors
- Speaker Stands
- Monitor Bases
- EPS Steering Motor Steel Housings
- Automobile Sensor Signal Wheels
- Shock Absorber Signal Wheels
- Lithium-ion Battery Housings
- Electron Gun Metal Stamping Parts
- Printer & Copier Metal Parts
