

# Metal Cut-Off Saw

This high-speed cut-off saw is designed for precise and efficient cutting of metal workpieces. It features a robust construction for durability and stability during operation.

## Product Overview

### High-Performance Cut-Off Machine

This high-speed cut-off machine is engineered for the precise and efficient cutting of metal workpieces. Built with robust construction, it ensures durability and stability during demanding operations. Equipped with a powerful motor and an abrasive cutting wheel, it delivers clean, accurate results for metal fabrication, construction, and manufacturing environments.

## Technical Specifications

Model Number	83554
Safety Features	Wheel Guard, Spark Deflector

## Operational Features

Workpiece Clamping	Yes
Adjustable Cutting Angle	Yes

## Compliance

### Certifications

SA • C • US
