

Metal Cutting Abrasive Disc

This abrasive disc is designed for cutting metal. It features an EN12413 A30 RBF specification.

Product Overview

High-Performance Metal Cutting Disc

This professional-grade abrasive cutting disc is engineered for precision and efficiency when working with metal materials. Designed with a slim profile for clean, fast cuts, it adheres to international safety and quality standards. Its robust construction ensures reliable performance across a variety of demanding cutting applications.

Dimensions

Diameter	115 mm
Thickness	1.2 mm
Bore Size	22.2 mm

Technical Standards

Safety Standard	EN12413
Abrasive Specification	A30 RBF

Application

Intended Use	Metal Cutting
