

Metal Cutting and Bending Machine

This cutting and bending machine is designed for precision metal forming. It features a robust frame and advanced control system for accurate cuts and bends.

Product Overview

Precision Metal Forming Solution

This metal cutting and bending machine is engineered for high-accuracy metal forming tasks across diverse industrial applications. Featuring a robust construction, it provides the stability required for consistent performance during intensive operations. The integrated control system and user-friendly interface simplify programming, enabling efficient workflow management for operators of varying skill levels.

Capabilities

Core Functions

Metal Cutting, Metal Bending, Metal Folding, Precision Forming

Operational Features

Control System

Advanced digital control system

Interface

User-friendly programmable interface

Construction

Frame Construction

Robust heavy-duty frame
