

Metal Cutting and Bending Machine

This machine is designed for cutting and fold-bending operations. It is ideal for metal forming applications requiring precision cutting and bending.

Overview

Precision Metal Processing Solution

This versatile Metal Cutting and Bending Machine is engineered for high-precision metal forming applications. Featuring a robust construction with a durable red frame, it integrates advanced cutting heads and a sophisticated control panel to ensure consistent results. The inclusion of a sliding table and dedicated material supports facilitates efficient and accurate processing for a wide range of workpieces.

Key Features

Capabilities

- Precision cutting
- Fold-bending operations
- Sliding table for material handling
- Integrated material supports

Design Highlights

Robust Frame, Control Panel Interface, Industrial Grade

Operational Metrics

Machine Type

Cutting and Fold-Bending
