

Metal Cutting and Bending Machine

This heavy-duty machine is designed for industrial cutting and fold-bending of metal sheets. It features robust construction, a precision cutting mechanism, and integrated wheels for easy mobility.

Overview

Industrial Metal Processing Solution

This heavy-duty cutting and fold-bending machine is engineered for high-precision industrial metalworking applications. Built with a robust construction and protective safety cage, it ensures both operator security and long-term durability in demanding environments. The integrated wheel system provides excellent mobility, allowing for flexible placement within your workshop or production facility.

Key Features

Core Capabilities

- Heavy-duty metal cutting
- Precision fold-bending
- Integrated safety cage
- Mobile design with wheels

Design Highlights

Industrial Grade, High Precision, Mobile, Safety Enhanced
