

Metal Cutting and Folding Machine

This heavy-duty machine is designed for industrial metal forming applications. It combines precise cutting mechanisms with fold-bending capabilities for versatile metal fabrication.

Overview

Industrial Metal Processing Solution

This heavy-duty cutting and fold-bend machine is engineered for demanding industrial metal forming applications. Designed for precision and durability, it provides a robust solution for shearing and bending tasks in manufacturing and construction environments. Its versatile design ensures efficient and accurate metal processing for a wide range of fabrication needs.

Technical Specifications

Machine Type	Shearing and Fold-Bending Machine
Primary Applications	Manufacturing, Construction, Metal Fabrication

Performance Metrics

Core Capabilities

- Heavy-duty metal shearing
- Precision fold-bending
- Robust frame construction
- High-accuracy processing
