

Metal Cutting and Folding Machine

This machine is designed for cutting and folding metal sheets. It delivers efficient and accurate results for various metalworking applications.

Product Overview

Versatile Metal Processing Solution

This industrial-grade machine is engineered for precision metal cutting and folding operations, essential for fabrication workshops. Designed for high efficiency and durability, it enables operators to achieve clean cuts and accurate bends across a variety of metal thicknesses. Its robust construction ensures stability during intensive use, making it a reliable asset for professional metalworking environments.

Application

Primary Applications

- Grinding
- Polishing
- Metal Finishing

Tool Compatibility

- Bench Grinders
- Angle Grinders
- Power Tools

Compatible Accessories

Grinding Wheels, Polishing Wheels, Finishing Discs
