

Metal Cutting and Folding Machine

This heavy-duty machine is designed for cutting and folding sheet metal with precision. It features a robust frame, hydraulic system, and segmented tooling for versatile bending operations.

Product Overview

Heavy-Duty Metal Forming Solution

This metal cutting and folding machine is engineered for precision and durability in demanding industrial environments. Featuring a robust frame and a reliable hydraulic system, it is designed to handle versatile bending and cutting operations with ease. The inclusion of segmented tooling and integrated safety systems ensures both operational efficiency and operator protection during use.

Technical Specifications

Design Features

- Robust heavy-duty frame
- Hydraulic system
- Segmented tooling
- Integrated control panel

Capabilities

Cutting, Folding, Bending, Hydraulic Operation

Safety & Compliance

Safety Features

Safety Guards • Emergency Warning Labels • Instruction Manual Required
