

Metal Cutting and Folding Machine

This heavy-duty machine is designed for precision cutting and folding of metal sheets. It features hydraulic cylinders and an advanced control panel for operational capabilities.

Overview

Industrial Metal Processing Solution

This heavy-duty machine is engineered for high-precision metal forming and shearing operations in demanding industrial environments. Featuring a robust construction with hydraulic actuation, it integrates cutting and bending capabilities into a single, efficient unit. The intuitive control panel allows for precise operational adjustments, making it an essential tool for professional metal fabrication workflows.

Technical Specifications

Machine Type	Hydraulic Cutting and Fold-Bend Machine
Operation Mode	Hydraulic
Key Features	Heavy-duty construction, Integrated cutting, Integrated bending, Hydraulic cylinders

Design & Build

Color Scheme

Light Gray • Blue • Orange
