

Metal Cutting and Folding Machine

This machine is designed for high-precision cutting and folding of metal sheets. It delivers efficient and accurate results for various industrial metal fabrication needs.

Overview

Precision Metal Fabrication

This high-precision cutting and folding machine is engineered for demanding metal forming applications. Designed to deliver consistent accuracy, it streamlines material processing for industrial fabrication tasks. Its robust construction ensures reliable performance, making it a valuable asset for workshops requiring efficient and high-quality metal shearing and bending capabilities.

Technical Specifications

Key Capabilities

- High-precision shearing
- Advanced fold-bend processing
- Accurate material forming

Model Identifier	1325
Applications	Metal Cutting, Folding, Bending, Industrial Fabrication
