

Metal Cutting and Folding Machine

This industrial machine is designed for cutting and folding metal sheets. It provides precise and efficient cutting and bending operations for various metalworking tasks.

Overview

Industrial Metal Forming Solution

This industrial cutting and fold-bend machine is engineered specifically for high-precision metal forming applications. Built with a robust construction, it ensures reliable, long-lasting performance even in the most demanding industrial environments. The machine features intuitive, user-friendly controls that streamline operations, making it an efficient choice for various metalworking tasks requiring both shearing and bending capabilities.

Technical Specifications

Model Identifier	X06-30
Machine Type	Metal Cutting, Folding, Bending, Shearing

Key Features

Performance Highlights

- Robust industrial construction
- High-precision shearing capabilities
- Integrated bending functionality
- User-friendly control interface
