

Metal Cutting and Folding Machine

This high-precision machine is engineered for cutting and folding metal with accuracy. Its robust frame ensures stability during intricate metal forming operations.

Overview

High-Precision Metal Processing

This metal cutting and folding machine is engineered for intricate metal forming operations, combining robust structural stability with an advanced control system. Designed for efficiency and accuracy, it features a powerful cutting mechanism alongside a versatile bending system. Its user-friendly interface ensures seamless operation, making it an ideal solution for diverse industrial metal fabrication requirements.

Technical Specifications

Model Identifier	DK7732BZ
Machine Type	Wire-cut Electrical Discharge Machine (Eco-friendly)

Features

Core Capabilities

- High-precision cutting
- Versatile fold-bending
- Advanced control system
- Robust frame construction

Application Suitability	Industrial Fabrication, Metal Forming, Precision Engineering
-------------------------	--
