

Metal Cutting and Folding Machine

This heavy-duty machine is designed for industrial applications requiring precise metal forming. It features a powerful cutting mechanism and a reliable folding system.

Overview

Industrial Metal Forming Solution

This heavy-duty cutting and fold-bend machine is expertly designed for demanding industrial applications. Engineered for both precision and long-term durability, it ensures efficient metal forming across various material types and thicknesses. The system integrates a powerful cutting mechanism with a reliable folding unit, supported by enhanced safety features and intuitive controls to maximize productivity in fabrication shops and manufacturing facilities.

Key Features

Suitable Environments

- Metal Fabrication Shops
- Construction Sites
- Manufacturing Facilities

Capabilities

Metal Cutting, Metal Folding, Metal Bending, Industrial Grade

Operational Safety

Safety Compliance

Yes

Control System

User-friendly manual controls
