

Metal Cutting and Folding Machine

This cutting and folding machine is designed for precision metal forming. It features a robust frame and a user-friendly control panel for parameter adjustment.

Overview

Precision Metal Forming Solution

This metal cutting and folding machine is engineered for high-precision metal forming tasks, combining robust construction with advanced operational capabilities. It integrates a precise cutting mechanism and a versatile fold-bending system, allowing for the creation of complex shapes with high accuracy and efficiency. Designed with safety and usability in mind, the machine features protective enclosures, emergency stop functionality, and an intuitive control panel for streamlined parameter adjustments.

Key Features

Operational Capabilities

- Precision metal cutting
- Versatile fold-bending system
- Complex shape formation
- Efficient parameter adjustment

Safety & Control

Safety Standards

Protective Enclosures, Emergency Stop System

Control Interface

Yes
