

Metal Cutting and Folding Machine

This precision machine is designed for cutting and folding metal materials. It features a versatile cutting system and precise bending capabilities suitable for various metalworking tasks.

Product Overview

Precision Metal Forming

This metal cutting and folding machine is a versatile solution engineered for high-precision metal forming applications. Combining robust construction with a reliable cutting system and accurate bending capabilities, it ensures stability and consistent results during operation. Designed for efficiency, the machine includes user-friendly controls and integrated safety features, making it an excellent choice for both small-scale workshops and industrial metal fabrication environments.

Technical Specifications

Model Identifier	DK7725AZ
Application	Metal Cutting, Metal Folding, Metal Bending, Metal Fabrication

Key Features

Key Capabilities

- Precision cutting system
- Accurate fold-bending functionality
- Robust, stable construction
- User-friendly control interface
- Integrated safety features
