

Metal Cutting and Folding Machine

This precision machine is designed for cutting and folding metal in various applications. It features a rigid frame, adjustable worktable, and integrated control panel for efficient and accurate metal fabrication.

Overview

Precision Metal Fabrication Solution

This precision cutting and fold-bending machine is engineered for high-performance metal forming applications. Featuring a robust, rigid frame and an adjustable worktable, it provides exceptional stability and control for both shearing and bending operations. Designed for versatility, this machine accommodates various metal types and thicknesses, making it an essential tool for efficient and accurate fabrication workflows.

Technical Specifications

Construction Features

- Rigid steel frame construction
- Adjustable worktable
- Integrated control panel

Capabilities

Metal Cutting, Metal Folding, Metal Bending, Shearing

Performance Metrics

Operational Highlights

1 Multi-function

Versatility

100 %

Precision Control
