

Metal Cutting and Folding Machine

This shearing machine is engineered for precise cutting and bending of metal sheets. It features user-friendly controls for easy operation and adjustment, enhancing productivity.

Overview

Industrial Metal Forming Solution

This industrial cutting and fold-bend machine is engineered for precision metal sheet processing. Designed for demanding environments, it offers robust construction to ensure stability and long-term reliability during operation. User-friendly controls allow for easy adjustments, helping to maximize productivity and minimize downtime in your metalworking tasks.

Technical Specifications

Model Identifier	CR-100E
Primary Applications	Metal Cutting, Metal Folding, Metal Bending, Sheet Forming

Performance

Key Performance Metrics

100 CR-E

Series Designation

Build Quality

Construction Features

- Robust industrial design
- High-stability frame
- Precision control interface
- Optimized for consistent output
