

Metal Cutting and Grinding Discs

These high-performance discs are designed for efficient material removal and precise cutting. Their reinforced construction ensures enhanced strength and longevity for demanding industrial and DIY tasks.

Product Overview

High-Performance Abrasive Discs

These high-performance cutting and grinding discs are engineered for efficient material removal and precise metalworking tasks. Designed for use with angle grinders, they feature a reinforced construction that ensures durability, safety, and longevity during operation. These discs are an ideal solution for demanding industrial and professional applications involving steel and stainless steel.

Technical Specifications

Performance Limits

8600 R.P.M Max Speed (180mm Disc)	14600 R.P.M Max Speed (105mm Disc)	80 m/s Max Peripheral Speed
---	--	---------------------------------------

Available Dimensions

Metric Size	Imperial Size
180 x 1.6 x 22.2 mm	7" x 1/16" x 7/8"
105 x 1.2 x 16 mm	5" x 3/64" x 5/8"

Compliance Standards

EN12413, Fe-Cu-S Free

Usage Information

Compatible Materials

- Steel
- Stainless Steel

Compatible Tools

Angle Grinders
