

Metal Cutting and Shaping Tool

This metal tool is designed for cutting, piercing, or shaping materials. It features a slender body and a flattened handle.

Product Overview

Precision Metal Cutting and Shaping Tool

This professional-grade tool is engineered for precision metal cutting, piercing, and shaping tasks. Featuring a long, slender body that tapers to a fine point, it allows for intricate work on various materials. The robust construction and smooth, untextured surface ensure durability and ease of handling during demanding manual operations.

Technical Specifications

Primary Applications

- Metal Cutting
- Material Piercing
- Precision Shaping

Material Composition

Steel/Iron Alloy

Design Characteristics

Tapered Point, Rectangular Handle, Slender Body, Smooth Finish
