

Metal Cutting Band Saw

This heavy-duty metal cutting band saw features a robust frame and a coolant system. It is equipped with a control panel for adjustments and monitoring.

Product Overview

Industrial Metal Cutting Performance

This heavy-duty metal cutting band saw is engineered for high-precision industrial metalworking applications. It features a robust, rigid frame design that ensures stability during demanding cutting tasks. Equipped with an integrated coolant system and an intuitive control panel, this machine provides efficient operation and ease of use for professional metal fabrication environments.

Technical Specifications

| | |
|--------------|--------------------------|
| Model Number | QB4260 |
| Application | Industrial, Metalworking |

Features

Key Features

- Robust frame construction
- Precision cutting capabilities
- Integrated coolant system
- User-friendly control panel
