

Metal Cutting Bandsaw

This metal cutting bandsaw is engineered for precise and efficient cutting of various metal materials. Its robust construction ensures stability and durability, providing reliable performance for diverse cutting applications.

Overview

Industrial Metal Cutting Performance

This metal band saw is engineered for high-precision cutting across a variety of industrial metal materials. Built with a robust, stable frame, it ensures consistent accuracy and long-term durability for demanding metalworking environments. The integrated coolant system effectively manages heat during operation, significantly extending blade life and maintaining cut quality.

Key Features

Machine Capabilities

- Precision metal cutting
- Integrated coolant system
- Adjustable cutting parameters
- Robust industrial construction

Safety Standards

Emergency Stop, Blade Guards, Shielding

Technical Specifications

Control System

Variable Speed Control • Emergency Stop • Function Switches

Model ID

CH-400
