

Metal Cutting Bandsaw

This metal cutting bandsaw is designed for precise and efficient cutting of various metal materials. It features adjustable settings for different cutting angles and material thicknesses, along with an integrated coolant system to reduce friction and extend blade life.

Overview

Professional Metal Cutting Solution

This metal band saw is engineered for high-precision cutting of round and square steel materials, making it an essential tool for metal fabrication workshops and construction sites. Built with a robust frame for maximum stability, the unit features a high-speed steel blade and a powerful motor to ensure smooth, consistent performance. Integrated coolant systems and essential safety mechanisms, such as emergency stops and blade guards, are included to enhance operational efficiency and user safety.

Technical Specifications

Certifications

CE

Blade Material

High-speed steel

Model Numbers

LTG5010B, LTG5010BZ

Features

Key Features

- Integrated coolant system for friction reduction
- Adjustable cutting angles
- Variable material thickness settings
- Emergency stop switch
- Protective blade guards

Applications

Suitable Industries

- Metal fabrication
- Construction sites
- Professional workshops
