

Metal Cutting Bandsaw

This bandsaw is used for cutting metal materials using a continuous, toothed metal band. The workpiece is fed into the blade, allowing for precise and efficient cuts.

Overview

Professional Metal Cutting Bandsaw

This industrial-grade metal cutting bandsaw is designed for precision and efficiency in metalworking and fabrication environments. Featuring a continuous, toothed metal band stretched between wheels, it allows for accurate stock sizing, intricate shaping, and curved profile creation. Built with a sturdy frame and integrated motor, this machine provides the reliability required for demanding shop tasks.

Technical Specifications

Machine Type	Metal Cutting Bandsaw
Primary Applications	Metalworking, Woodworking, Fabrication

Key Features

Core Components

- Sturdy Frame
- Work Table
- Motor Drive System
- Coolant System
- Blade Guides

Performance Features

Adjustable Speed • Adjustable Feed Rate • Precise Cutting • Continuous Blade
