

Metal Digging Shovel with Pointed Blade

This shovel features a durable metal head with a pointed blade for effective digging. The shovel head includes a secure socket for handle attachment, ensuring reliability during various earth-moving applications.

Product Overview

Professional Grade Digging Tool

This high-quality metal shovel features a precision-engineered pointed blade designed for maximum soil penetration and efficient earth-moving tasks. Built for durability and reliability, the head includes a reinforced socket to ensure a secure handle connection during heavy-duty operation. It serves as an essential tool for professional landscaping, construction, and agricultural applications.

Technical Specifications

Item Number	S506
Material	High-quality metal
Blade Shape	Pointed
Connection Type	Socket for handle insertion
Primary Application	Digging, Earth-moving, Construction, Landscaping
