

Metal Drilling Press

This drill press is a robust machine designed for precision drilling in metal and other materials. Its sturdy construction minimizes vibration, while variable spindle speeds and an adjustable table support diverse drilling applications.

Overview

Versatile Metal Drilling Press

The DP Type Drill Press is a robust and versatile machine designed for precision drilling in metal and other materials. Featuring a sturdy cast iron construction for stability and reduced vibration, this drill press offers a wide range of spindle speeds to accommodate various drilling applications. It is light and flexible, making it suitable for machine processing, professional repairing, as well as DIY projects and daily use.

Key Features

Safety & Convenience Features

- Adjustable worktable for accurate positioning
- Tilttable worktable for angled drilling
- Depth stop for consistent drilling depths
- Chuck guard for operator safety
- Integrated work light for enhanced visibility

Capabilities

Machine Processing, Repairing, DIY Projects, Daily Use
