

Metal-Enclosed Fixed Switchgear

This metal-enclosed switchgear is designed for electric power transmission and distribution. The fixed-type switchgear provides a secure and reliable solution for switching and protection in electrical systems.

Product Overview

Internal structural breakdown of the XGN2-12 fixed metal-enclosed switchgear.

XGN2-12 Box-Type Fixed Switchgear

The XGN2-12 series is a robust metal-enclosed switchgear engineered for 3.6-12kV, three-phase AC 50Hz electrical power transmission and distribution systems. Designed for reliability and safety, this fixed-type cabinet is ideal for use in power plants, substations, industrial enterprises, and high-rise commercial buildings. With over 100 available main circuit schemes, it offers versatile configuration options to meet the demanding requirements of modern power distribution networks.

Technical Specifications

Rated Current Range

- 630
- 1250
- 1600
- 2000
- 3150

Key Performance Metrics

40 kA

Max Short-circuit Breaking Current

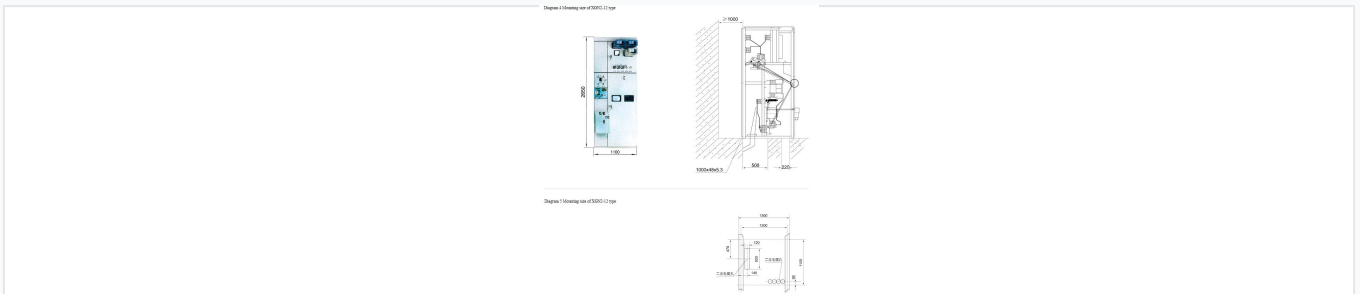

4 s

Heat Stable Heating Time

Rated Voltage

3.6 kV, 7.2 kV, 12 kV

Operating Environment

Technical mounting dimensions for standard site installation.

Operating Environment Requirements

Parameter	Specification
Air Temperature	-25°C to +40°C
Altitude	Max 1000m
Max Daily Humidity	95%
Max Monthly Humidity	90%
Earthquake Intensity	Up to 8 degrees

Compliance

Industry Standards

IEC62271-200, GB3906, DL/T404
