

Metal Fastening Bolt

This is a metal fastening bolt. It is suitable for various mechanical and construction applications requiring secure fastening.

Product Overview

High-Precision Metal Fastening Bolt

This high-quality metal fastening bolt is engineered for reliability in demanding mechanical and construction environments. Featuring precision machining and a smooth surface finish, it ensures consistent performance and secure assembly. Its corrosion-resistant material composition makes it an ideal choice for applications requiring long-term durability and structural integrity.

Material & Finish

Surface Finish

Precision Machined • Smooth Finish

Material

Stainless Steel

Application

Primary Applications

Mechanical Assembly, Construction, Industrial Fastening

Performance

Key Performance Features

- Corrosion-resistant material
- High-precision threading
- Secure fastening capability
