Product Overview

Professional Metal Flat Washers

These metal flat washers are engineered for demanding mechanical assemblies, providing essential load distribution and surface protection. Constructed from high-quality SPCC steel, they are designed to integrate seamlessly into diverse fastening environments. With advanced surface treatment compliant with RoHS 2.0 standards, these components ensure both durability and environmental safety for industrial applications.

Technical Dimensions

Dimensional Specifications

35 mm

Minimum Outer Diameter

240 mm

Maximum Outer Diameter

2 mm

Minimum Thickness

12.5 mm

Maximum Thickness

Material and Compliance

Material Composition and Standards

SPCC, RoHS 2.0 Compliant, Cr3+ Plating

Manufacturing and Assembly

Processing and Installation

- Punching or Turning inner hole
- Riveting
- Tapping
- Metal frame riveting
- Plastic frame riveting
