

Metal Forming Machine Safety Cage

This heavy-duty metal cage is designed for industrial applications, providing a protective barrier around metal forming machines. Constructed from robust metal bars, the trapezoidal-shaped cage features vertical bar reinforcement for enhanced containment and safety.

Product Overview

Industrial Safety Solution

This heavy-duty safety cage is specifically engineered for industrial metal forming applications. Constructed from robust, high-grade metal bars, it provides a reliable protective barrier for machine operators. Its reinforced trapezoidal design ensures structural integrity while maintaining visibility and containment during machine operation.

Design and Construction

Reinforcement

- Vertical bar reinforcement
- Containment-focused design
- Robust industrial-grade frame

Construction Style	Heavy-duty metal bar cage
Shape	Trapezoidal

Applications

Suitable For	Metal Forming Machines, Machine Tools, Industrial Safety
