

Metal Forming Power Press

This heavy-duty mechanical power press is designed for metal forming applications. It features precision controls, a robust frame, and a user-friendly interface for efficient and accurate operation.

Overview

Industrial Metal Forming Power Press

This heavy-duty mechanical power press is engineered specifically for demanding metal forming applications. It features a robust frame construction and precision controls, ensuring both durability and accuracy in high-volume industrial environments. Designed with operator safety and efficiency in mind, it provides a reliable solution for diverse metalworking tasks including punching, bending, and stamping.

Technical Specifications

Model Number	JZ21K-110
Series	ZDM

Capabilities

Suitable Applications	Punching, Bending, Stamping
-----------------------	-----------------------------

Features

Key Features

- Robust frame construction
- Precision control system
- User-friendly interface
- Integrated safety features
