

Metal Hair Styling Clamp

This hair clamp is constructed from durable metal and features a robust gripping mechanism. The clamp has smooth, rounded edges to prevent hair damage and an ergonomic design for comfortable handling.

Product Overview

Professional Hair Tension Testing Clamp

This high-quality metal hair styling clamp is specifically engineered to assist in hair tension testing procedures. Constructed from durable metal, it features a robust gripping mechanism designed for reliability and precision. The clamp is built with smooth, rounded edges to ensure hair integrity is maintained during testing applications.

Technical Specifications

Primary Application

Hair Tension Test • Laboratory Testing

Key Design Features

- Robust gripping mechanism
- Smooth, rounded edges
- Ergonomic handling

Material

Metal
