Product Overview

High-Efficiency Fishing Illumination

This metal halide fishing lamp utilizes leading-edge coating technology to deliver high luminance and exceptional lumen efficacy. Designed specifically for the demanding maritime environment, it features a robust construction capable of withstanding thermal shock without breakage. The lamp is engineered to emit a specific light spectrum optimized for attracting squid, making it an essential tool for professional fishing operations.

Technical Specifications

Environmental Features	Low UV Radiation, Environmentally Friendly
Mechanical Durability	Yes
Installation	Standard screw base for easy replacement

Performance Metrics

Primary Application

Squid Attraction • Night Fishing
